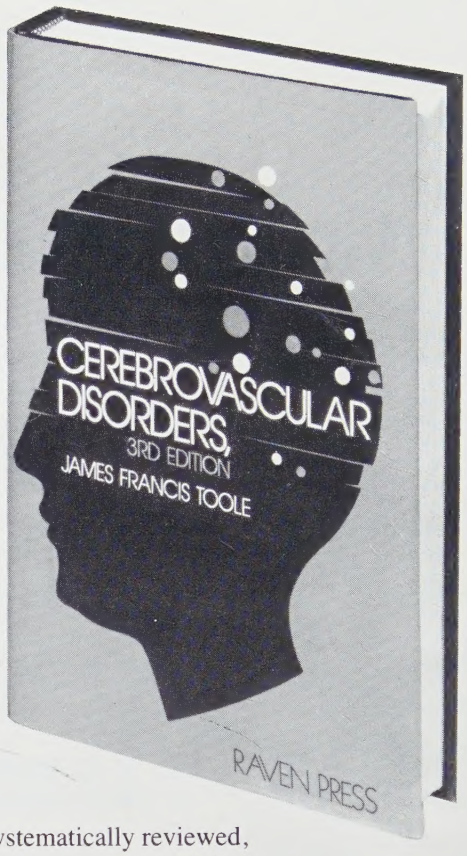
Now. . . Revised and Expanded!
The Classic Text in the Field

CEREBROVASCULAR DISORDERS, 3rd EDITION

By James Francis Toole, M.D.



Thoroughly updated, **Cerebrovascular Disorders, Third Edition** reflects the new technology and new treatment modalities that are significantly advancing the field of cerebrovascular disease. Every chapter has been revised and brought up to date with new material, and several new chapters have been added.

640 pages,
88 illustrations,
58 tables, $67.50
ISBN 0-89004-713-8
Order Code 1156

The important clinical aspects of the anatomy of the brain arteries and veins are systematically reviewed, as are relevant aspects of the physiology of cerebral circulation. Drawing on his thirty years of clinical experience, Dr. Toole offers valuable guidance on evaluating patients with potential neurological disorders. He stresses the importance of history taking, discusses valuable neurological and neurovascular examinations and their interpretation, and describes several noninvasive screening tests.
No other book provides such current and comprehensive coverage of the field. **Cerebrovascular Disorders, Third Edition** is a valuable, practical reference for all physicians who manage stroke patients, especially neurologists, neurosurgeons, residents, and house officers.

CONTENTS: • Applied Anatomy of the Brain Arteries • Clinical Physiology of Cerebral Circulation • Interview and Neurovascular Examination • Syndromes of the Carotid Artery and Its Branches • Syndromes of the Vertebral-Basilar Artery and Its Branches • Transient Ischemic Attacks (TIAs) • Medical Management of TIAs • Surgical Management of TIAs • Special Diagnostic Tests • Asymptomatic Cervical Bruits and Their Management • Cardiac Causes of Cerebral Ischemia • Cerebral Embolism • Atherosclerosis • Brain Infarction • Ophthalmologic Aspects of Cerebrovascular Disease • General Principles of Management and Rehabilitation • Behavioral Abnormalities and Intellectual Decline Caused by Cerebrovascular Disorders • Hypertension, Lacunar Infarction and Hypertensive Encephalopathy • Intracerebral Hemorrhage • Inflammatory Angiopathies • Unusual Vascular Diseases • Microcirculation and Diseases Which Affect It • Cerebrovascular Causes of Headache • Subarachnoid Hemorrhage • Intracranial Arterial Aneurysms • Arteriovenous Malformation, Fistulae and Encephalofacial Angiomatosis • Anatomy and Diseases of the Venous System • Spinal Cord Vascular Anatomy and Diseases
